DETAILED ACTION

Response to Amendment

1. Amendments to claims 18 and 23 - 25, filed on October 19, 2004, have been entered in the above-identified application.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

3. The drawings were received on October 19, 2004. These drawings are accepted.

Claim Rejections - 35 USC § 102

4. Claims 18 and 20 - 25 are rejected under 35 U.S.C. 102(a) as being anticipated by Aratani (WO99/39342) as evidenced by applicants' admissions for the reasons of record as set forth in Paragraph No. 9 of the Office Action mailed on July 19, 2004. See U.S. Patent No. 6,572,957 B1) which is the U.S. equivalent of WO '342.

Claim Rejections - 35 USC § 103

5. Claims 18, 20, 21 and 23 - 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujii et al. (U.S. Patent No. 6,249,489 B1) in view of Aratani (WO '342) and as evidenced by applicants' admissions for the reasons of record as set forth in Paragraph No. 10 of the Office Action mailed on July 19, 2004.

Response to Arguments

6. The rejection of claims 18 and 20 - 25 under 35 U.S.C § 102(a) – Aratani

Applicant(s) argue(s) that Aratani must possess four magnetic layers, which therefore does not read on the claimed three magnetic layers of the present invention since the DS layer of Aratani cannot correspond to the claimed first magnetic layer (*pages 11 – 14 of response*). Applicants further argue that the Examiner has erred in the interpretation of the Aratani reference (*page 12 of response*). The examiner respectfully disagrees.

First, the Examiner notes that the present claims are open to additional layers being present and applicants are suggested to positively recite that the magnetic layers are directly disposed on each other or exclude additional magnetic layers in a similar, supported, fashion. Regarding the argument that the relied upon layer in Aratani can't meet the limitation of the "first magnetic layer is composed so as to be characterized ... to restrict movement of a domain wall located beyond the light beam spot rear part", the Examiner notes that this limitation is a functional limitation and, provided the function is met, the limitation will be met. The Examiner notes that the relied upon DS layer *has a*

composition (i.e. any composition) and the domain wall located beyond the light beam rear spot is restricted in its movement (albeit by the interaction with the YS layer), hence the DS layer must be “composed so as to be characterized ... to restrict movement of a domain wall located beyond the light beam spot rear part”, since the domain wall located out of the light beam rear spot *is* restricted in it’s movement in the DS layer.

Regarding the alleged mischaracterization of the Aratani reference, the Examiner notes that the relied upon sections describe the Aratani layers which are comparable to the layers used in the prior art, *as well as the novel YS layer taught by Aratani*. The Examiner suggests applicants re-read the relied upon sections in view of the rejections of record, since the Examiner deems the cited notations are correct.

7. The rejection of claims 18, 20, 21 and 23 - 25 under 35 U.S.C § 103(a) – Fujii et al. in view of Aratani

Applicant(s) argue(s) that the combination of Aratani with Fujii et al. meets the deficiencies mentioned above and that the insertion of the YS layer into the Fujii et al. invention would not yield the claimed invention (*pages 15 – 18 of response*). The examiner respectfully disagrees.

First, the Examiner notes that applicants’ claims are open to additional layers as commented on above. Second, the Examiner notes that Aratani et al. was not relied upon to teach the insertion of the YS layer, but merely to teach the equivalent functional use of the orientation of the read-out/reproducing film below the recording temperature.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
